Panopto X ATOMIC JOLT

Migrate Content,
Not Headaches

Seamless LMS Relinking with Atomic Jolt Redirect

Effortless Transition to Panopto with Zero Downtime

Migrating to a new video platform can be daunting. It's a complex and time-consuming process involving tedious link updates, integration challenges, and user retraining.

With Atomic Jolt Redirect, we eliminate these headaches. Your Panopto content automatically replaces legacy video objects, ensuring uninterrupted access for your students, educators, and platform administrators.

Time is Precious. Reclaim it.
Eliminate the manual effort of updating thousands of video links across your LMS.

Learning Never Stops.
Zero downtime ensures uninterrupted creation and sharing of video content.

Simplify Video Workflows.
Establish simple, streamlined, go-forward video learning workflows that enhance teaching and learning.

How Atomic Jolt Redirect Works

Our teams come together to review the conversion process, timeline, and deliverables.

1 ATOMIC SEARCH INTEGRATION:
In your LMS's instance, we install Atomic Search, an LTI 1.3 tool.

2 CONTENT INDEXING:
Atomic Search indexes your LMS content, identifying all video URLs from your previous provider.

3 LINK MAPPING
You map old video links to their new Panopto equivalents.

4 PREVIEW AND APPROVAL:
We migrate, test, and review two courses before proceeding to the final step.

5 FULL LMS RELINKING:
The conversion process is carried out across all your courses in your LMS.

6 REVERT SERVICE:
Our team can revert the links to their original paths if necessary.
